

GreenWorks Storyboard

December 08 2021

Contents

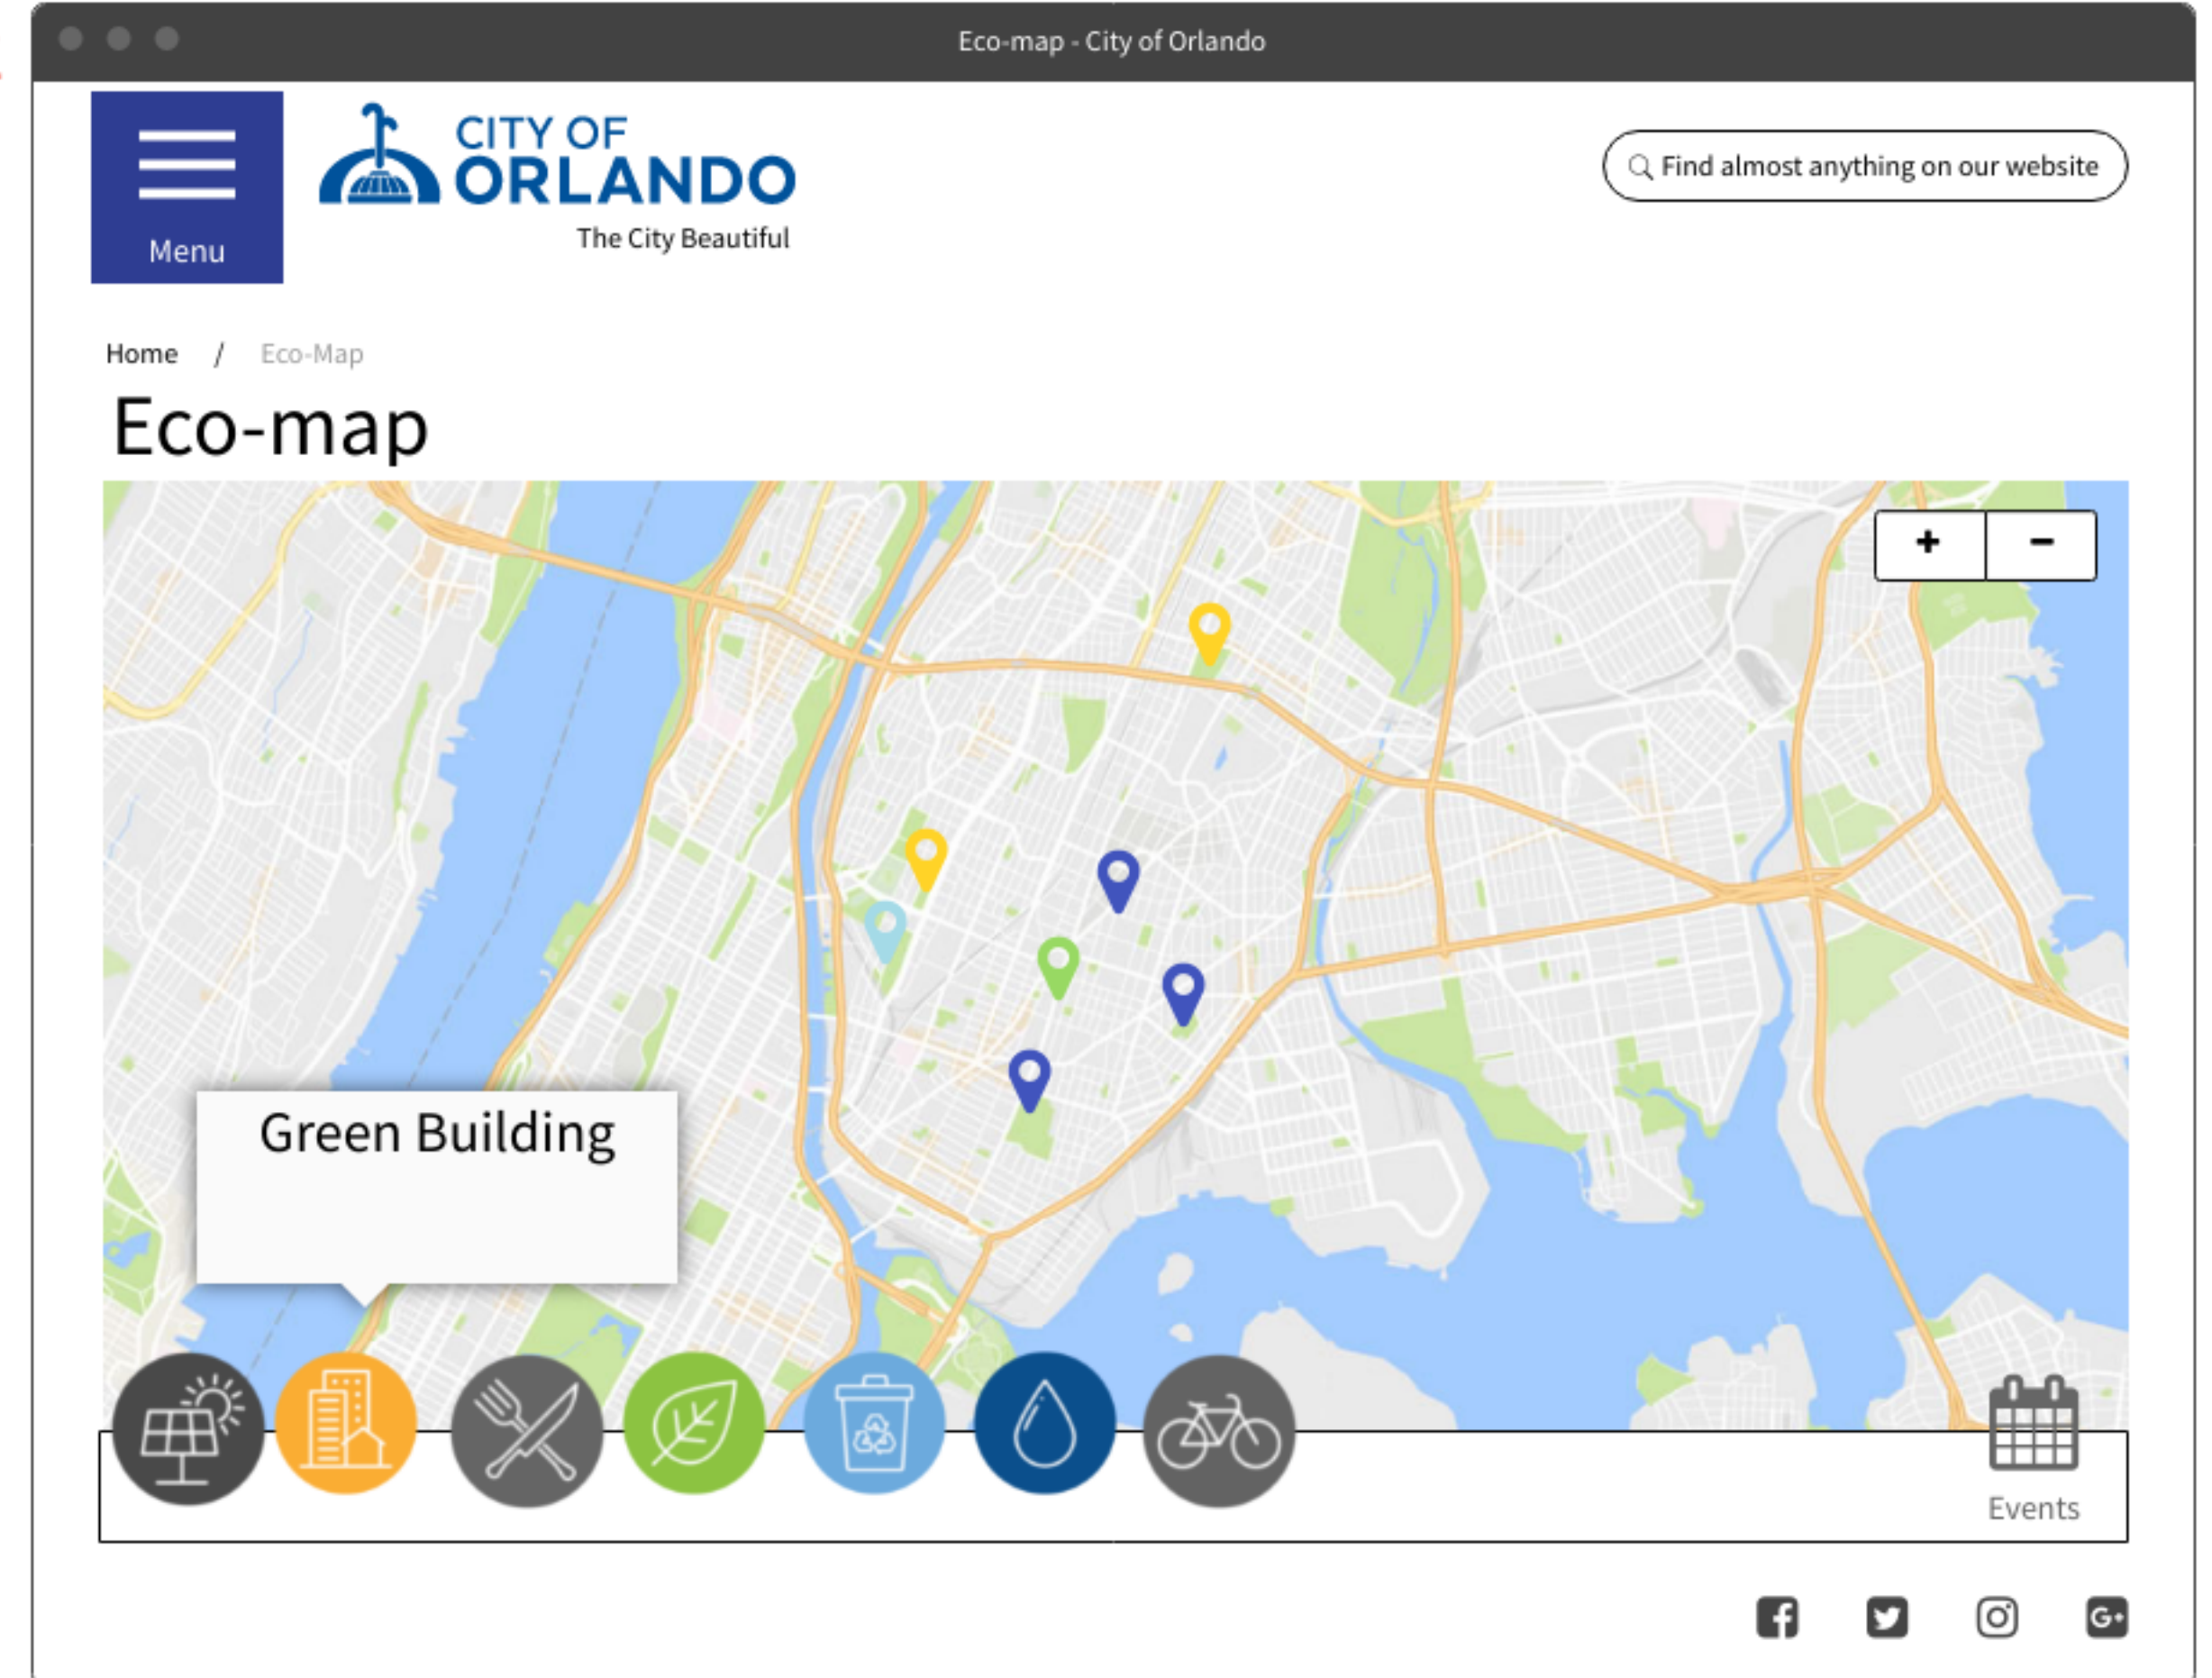

1. Desktop/Mobile Landscape view
2. Mobile Portrait View

1

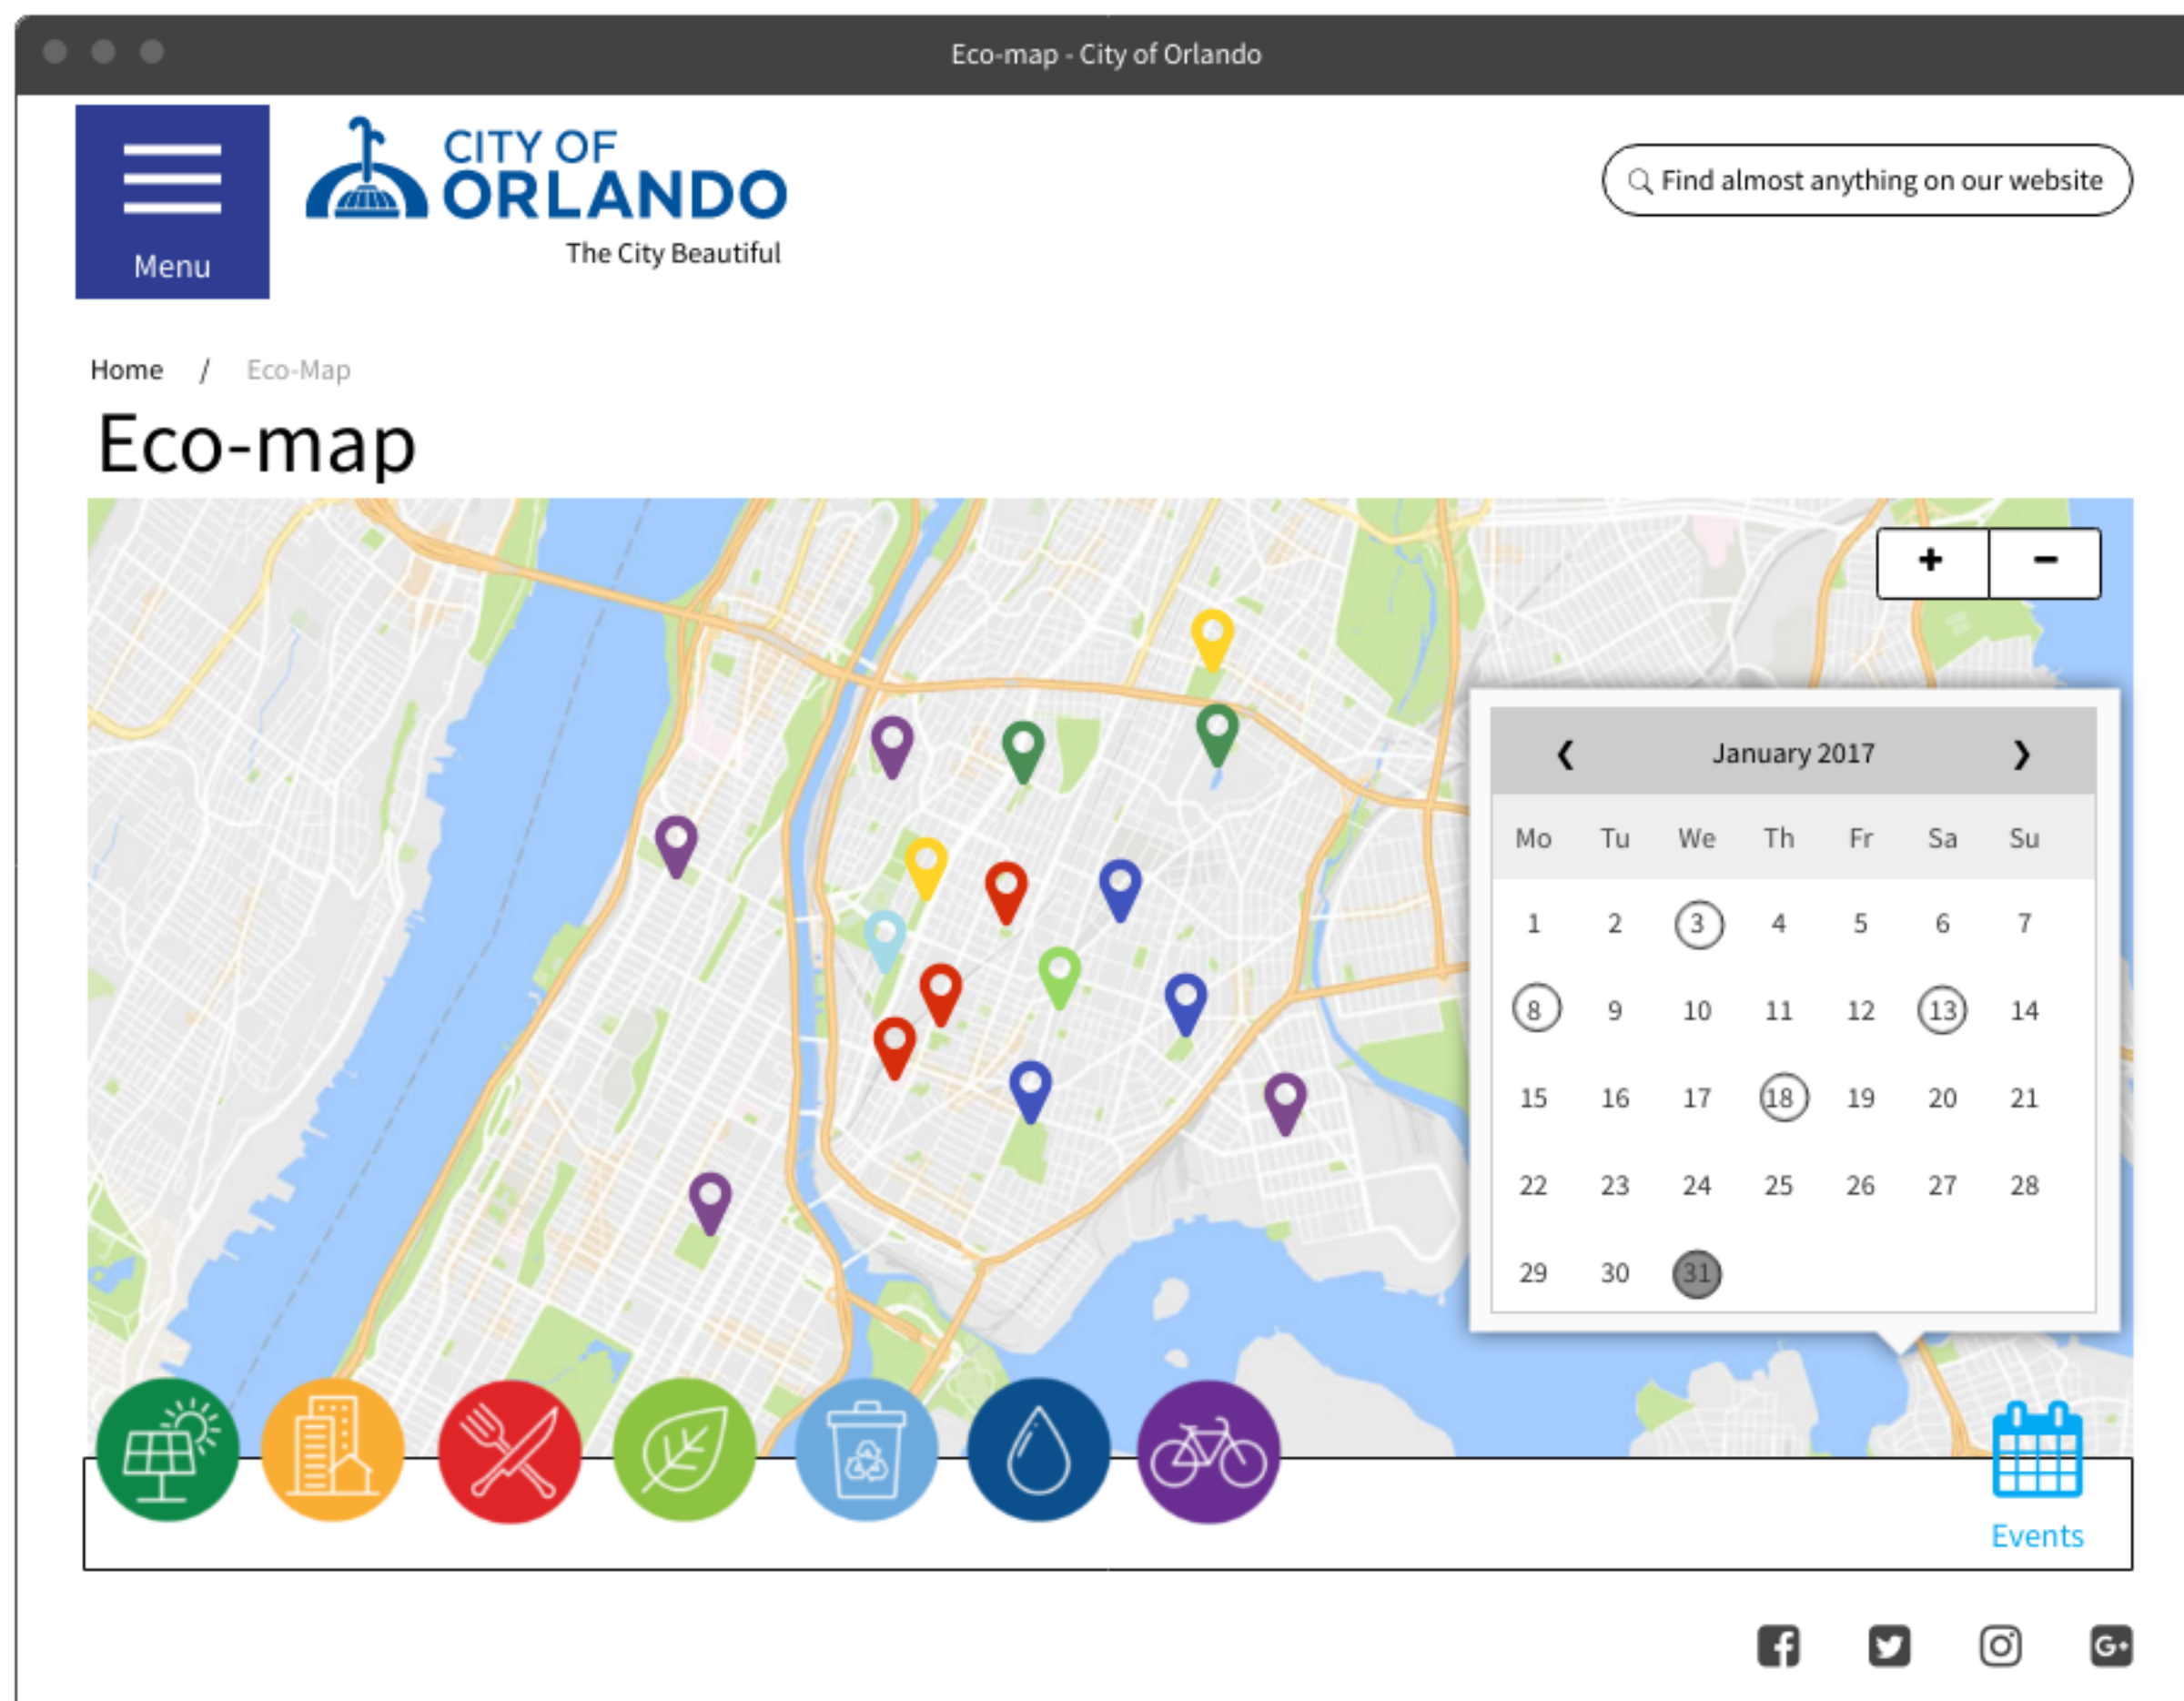

Default: This is the view the user will see when opening the Eco-map page

2

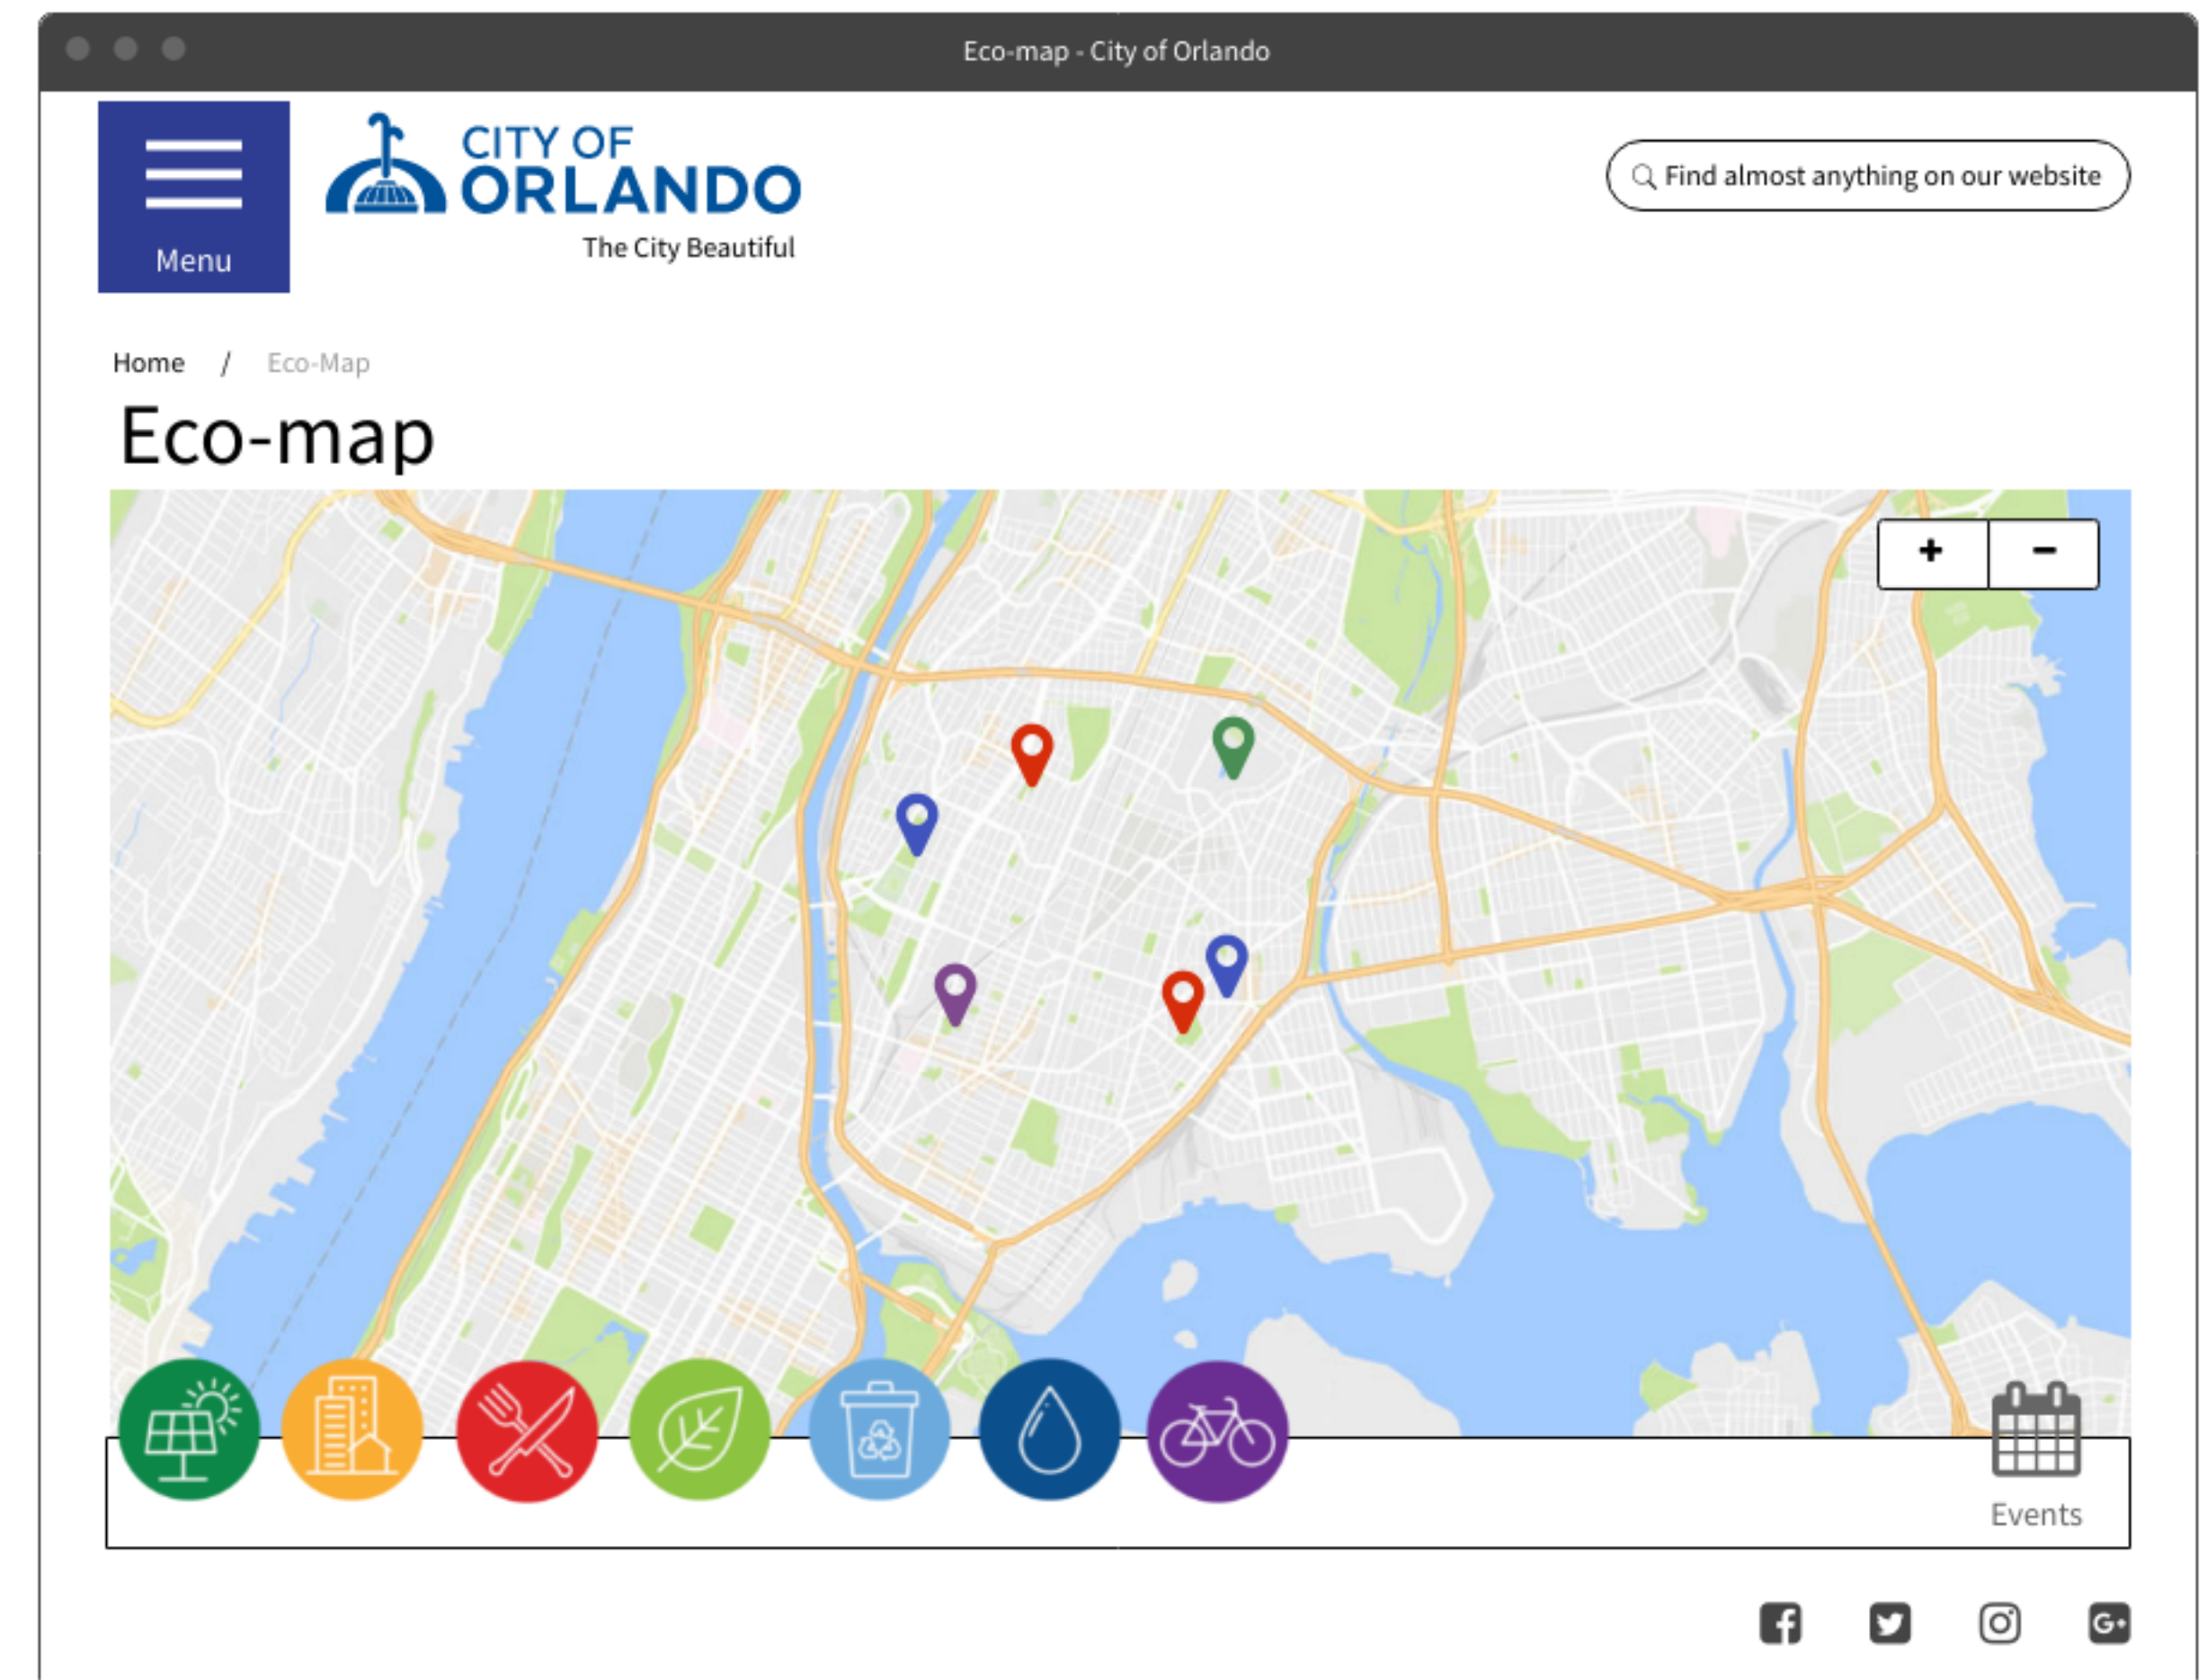

The user selects the filter icons along the bottom-left to remove those items from the map. Hovering over the icon identifies the filter name

3

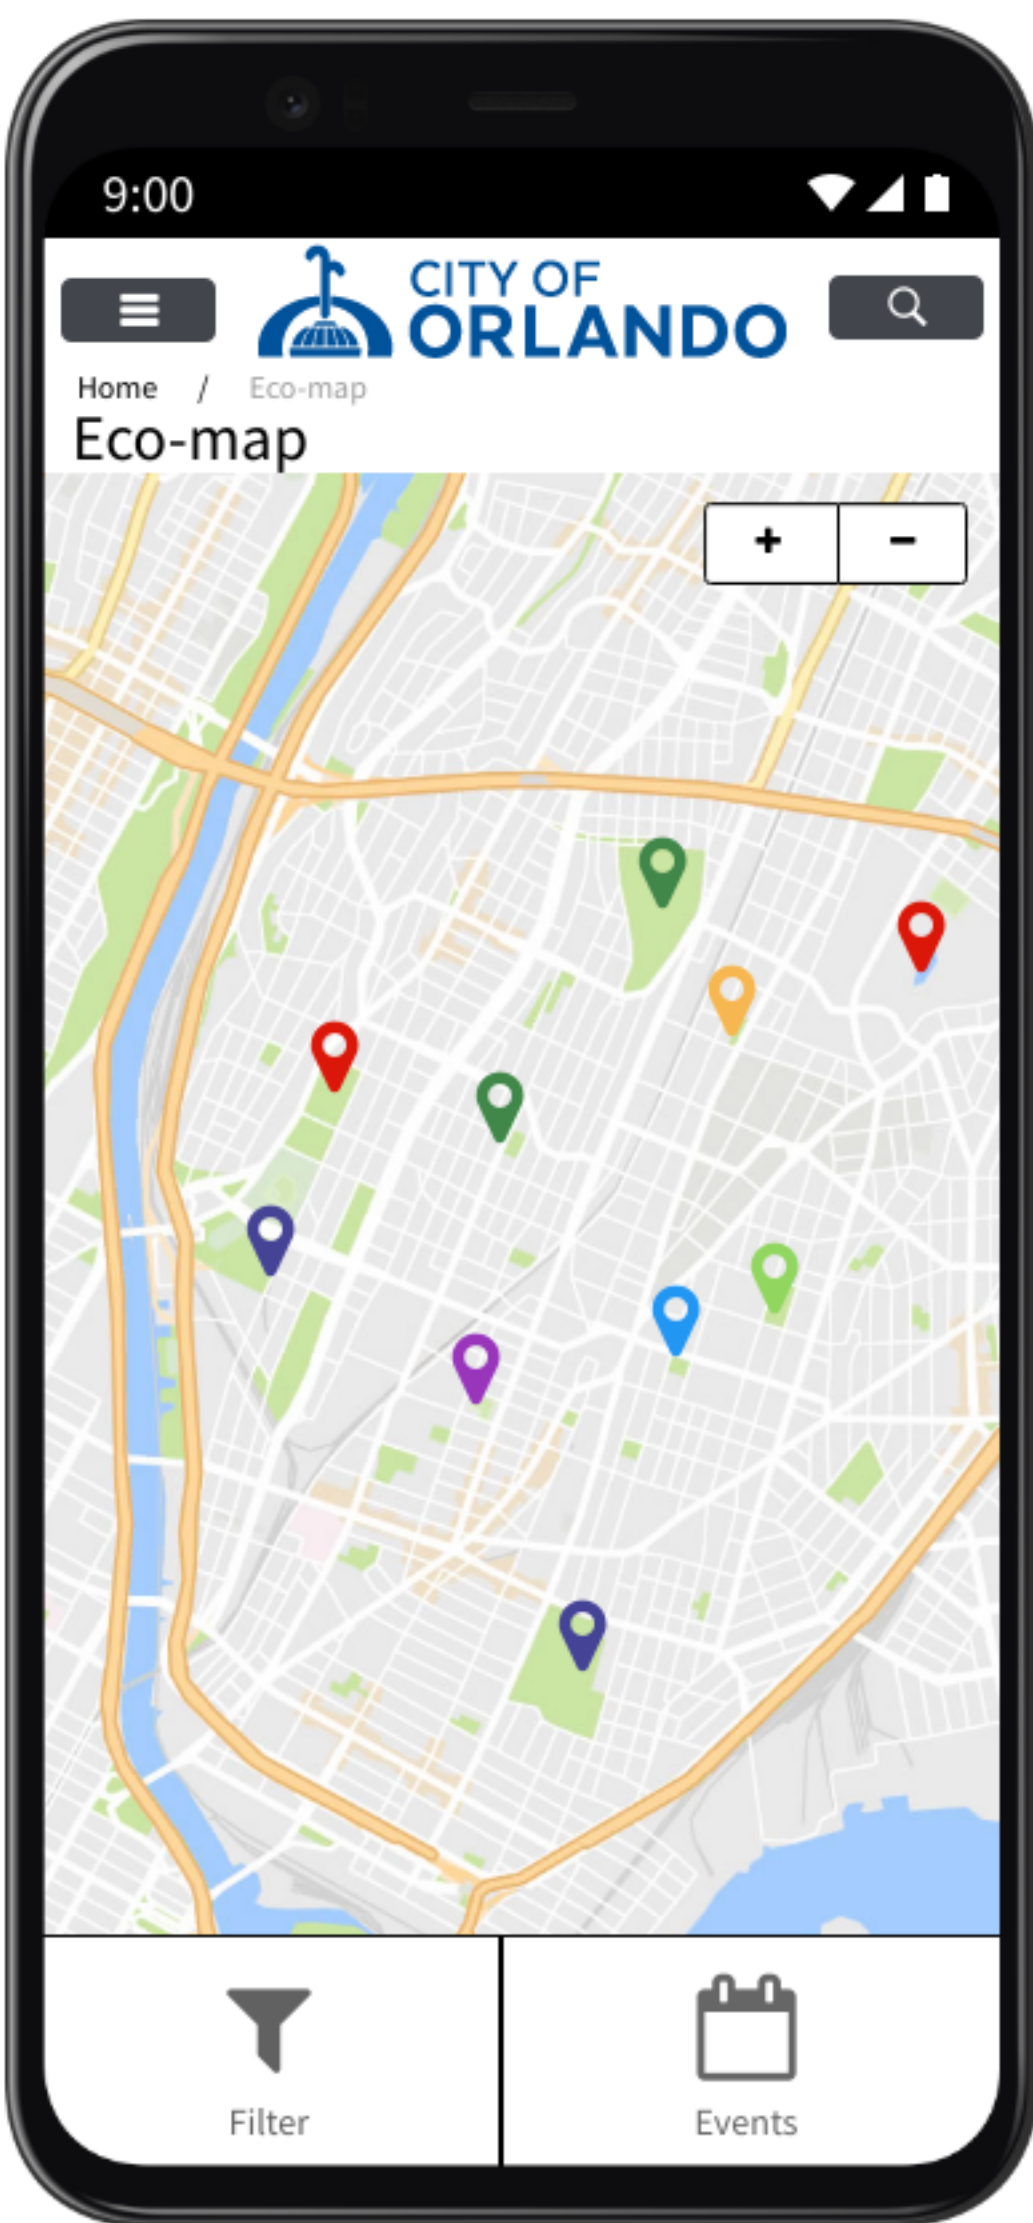

The user selects the Events icon to expand the events calendar

4

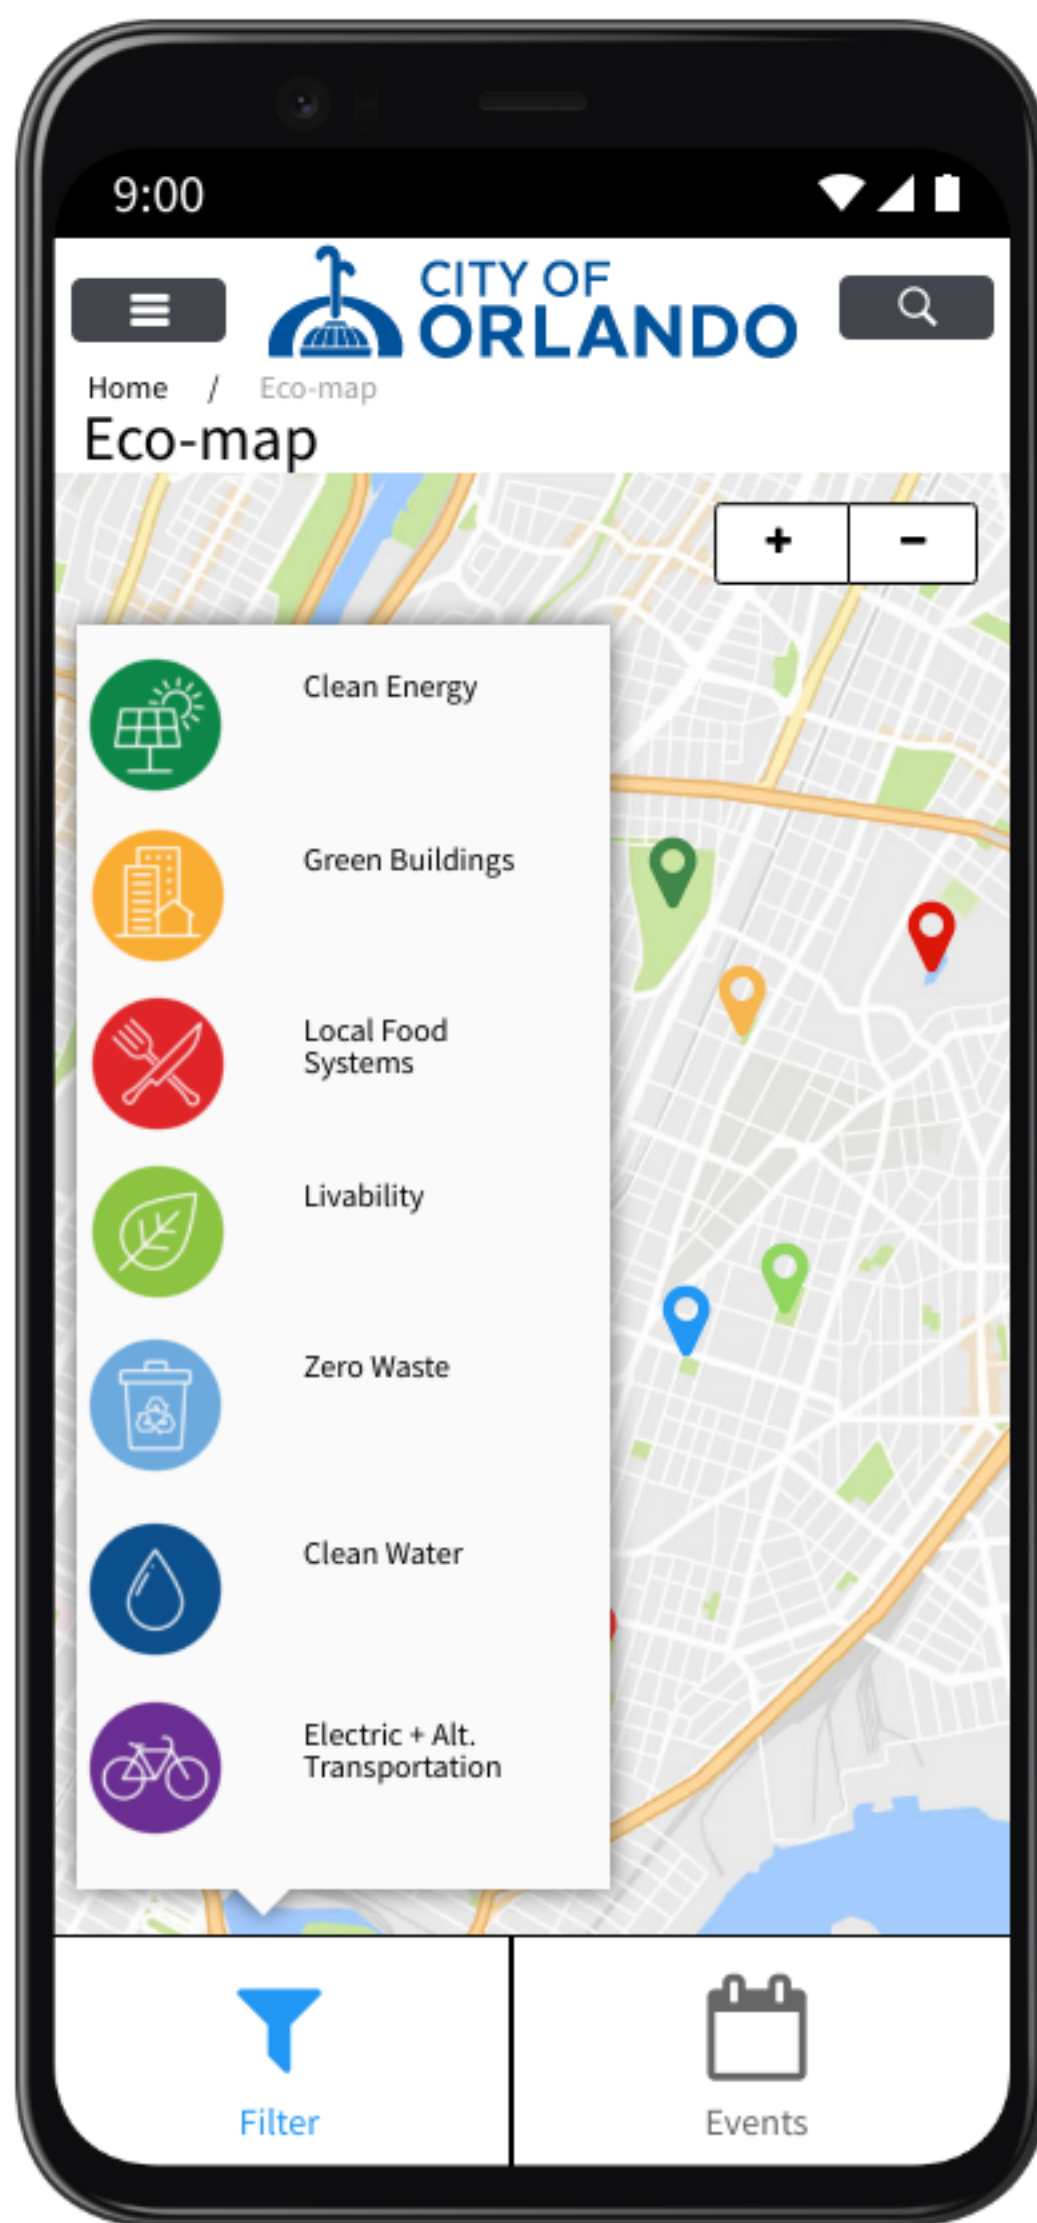

The user chooses a date to populate the map with events occurring on that day

1

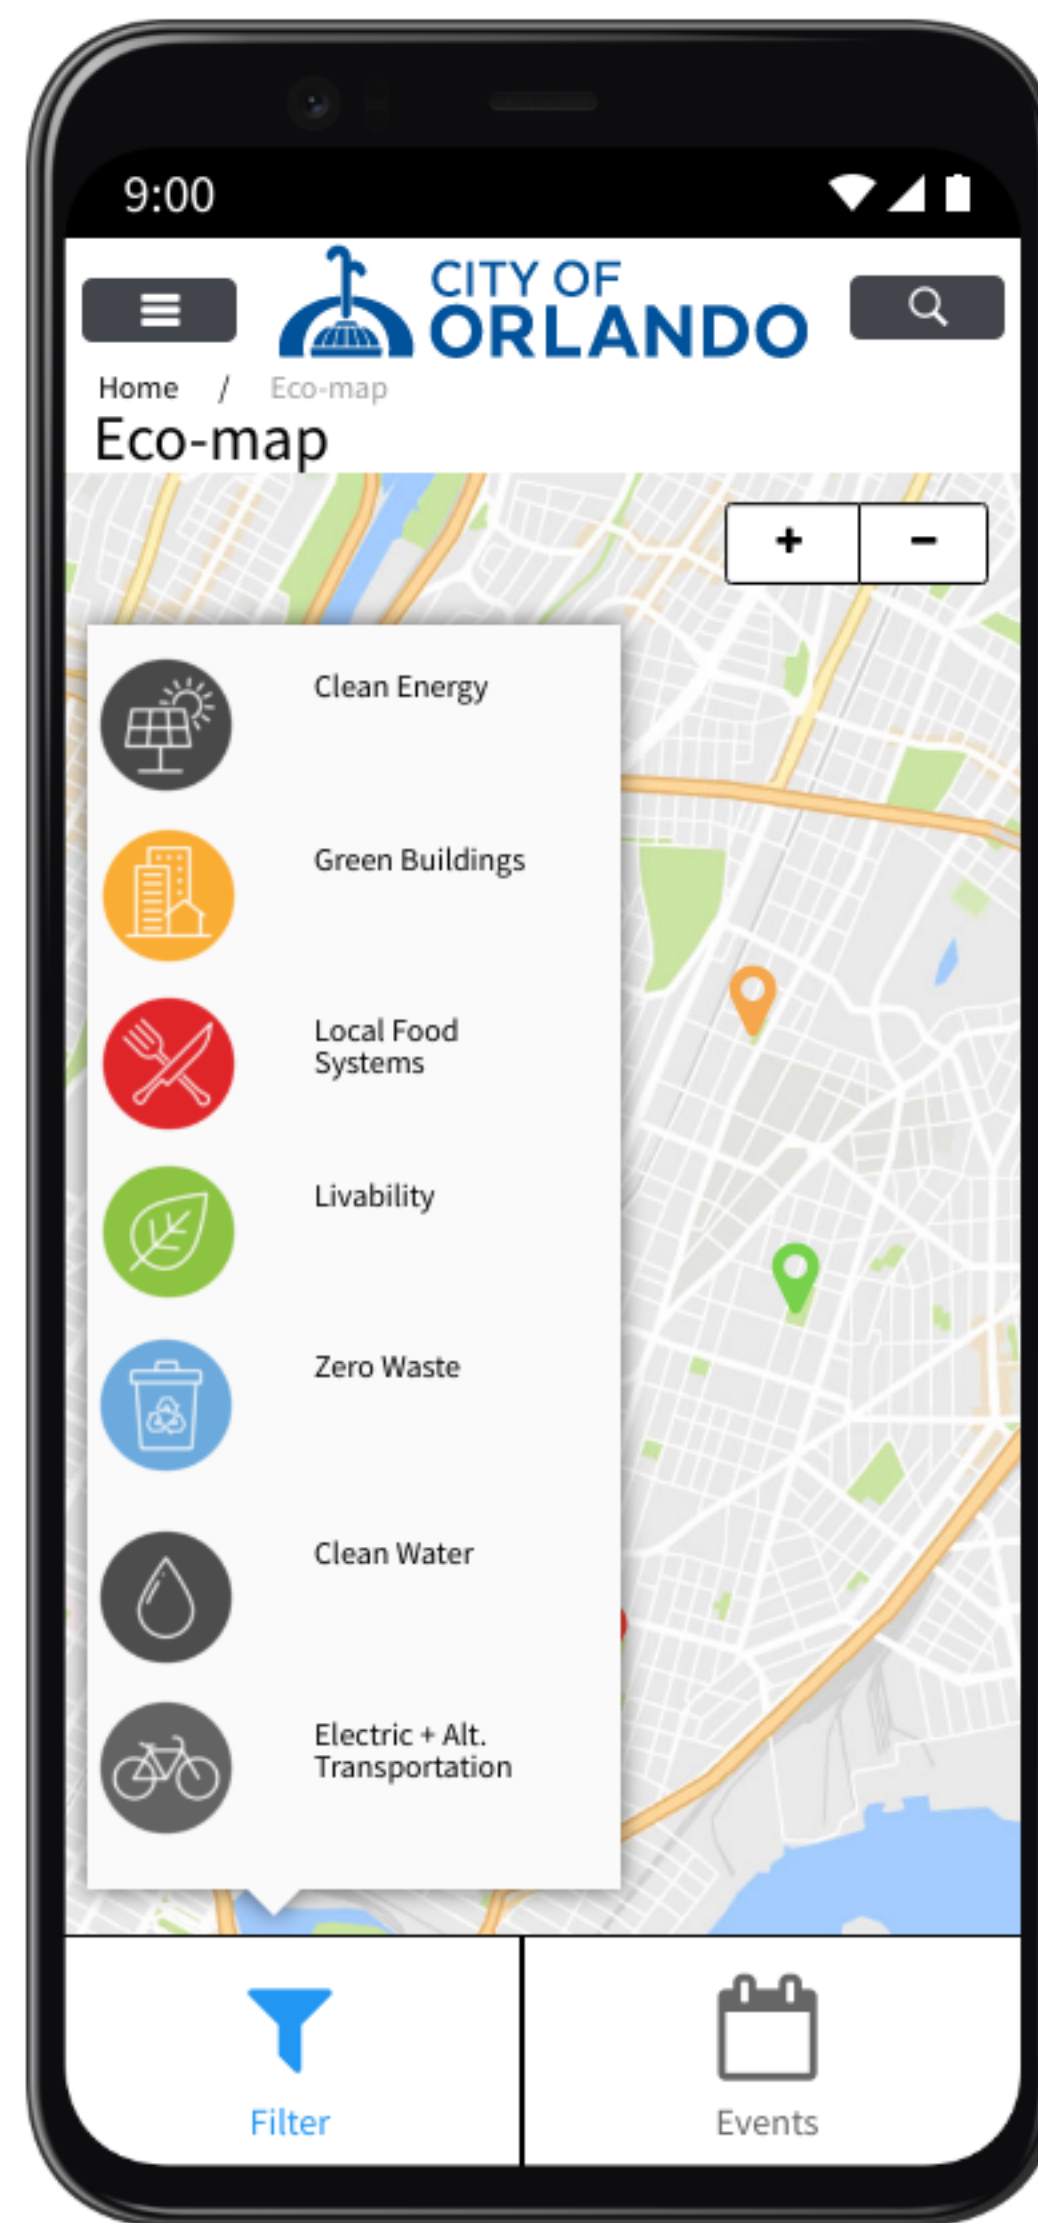

Default: This is the default view the user will see in portrait mode

2

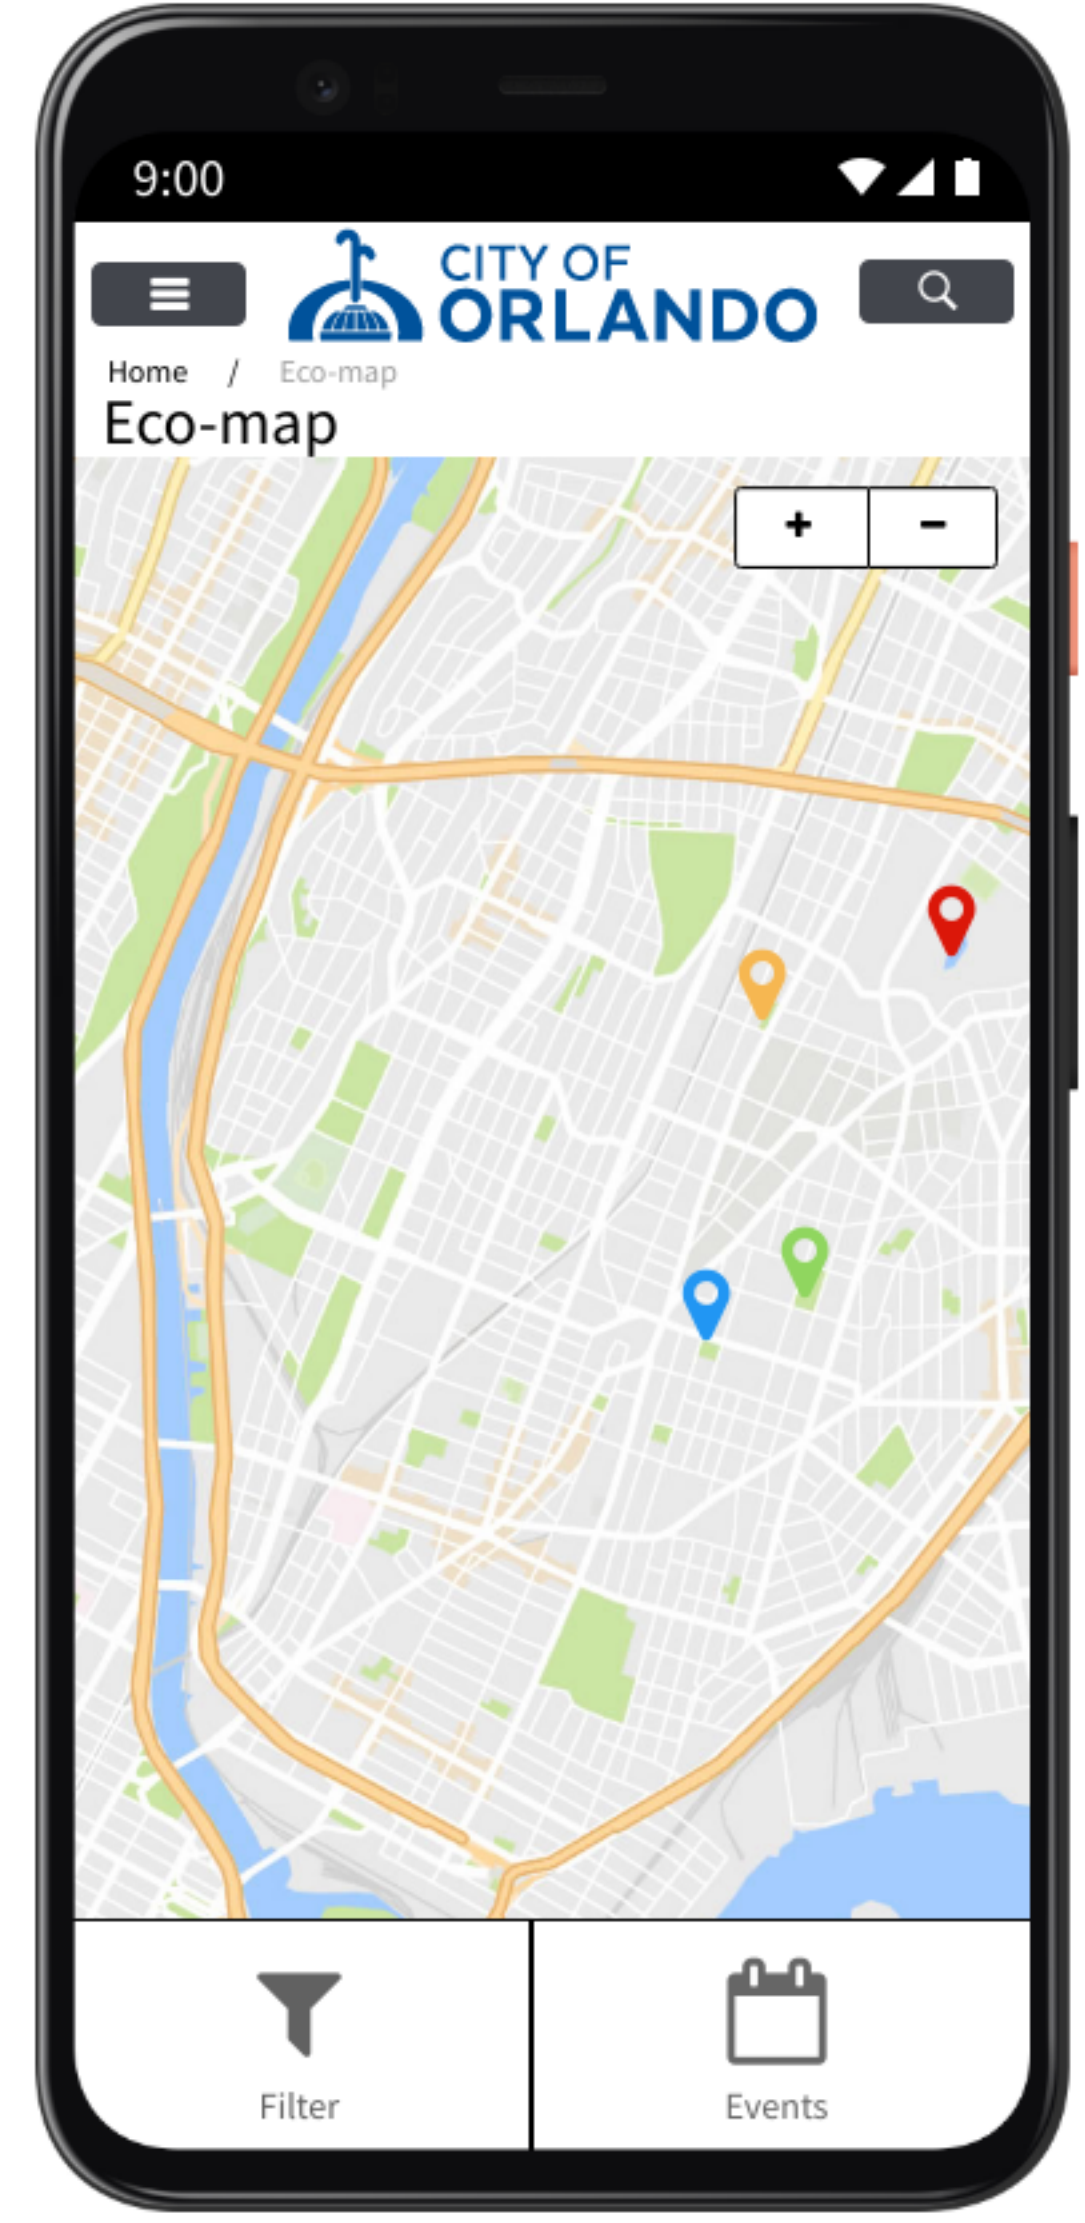

The user selects the Filter option which expands a menu with a list of items

3

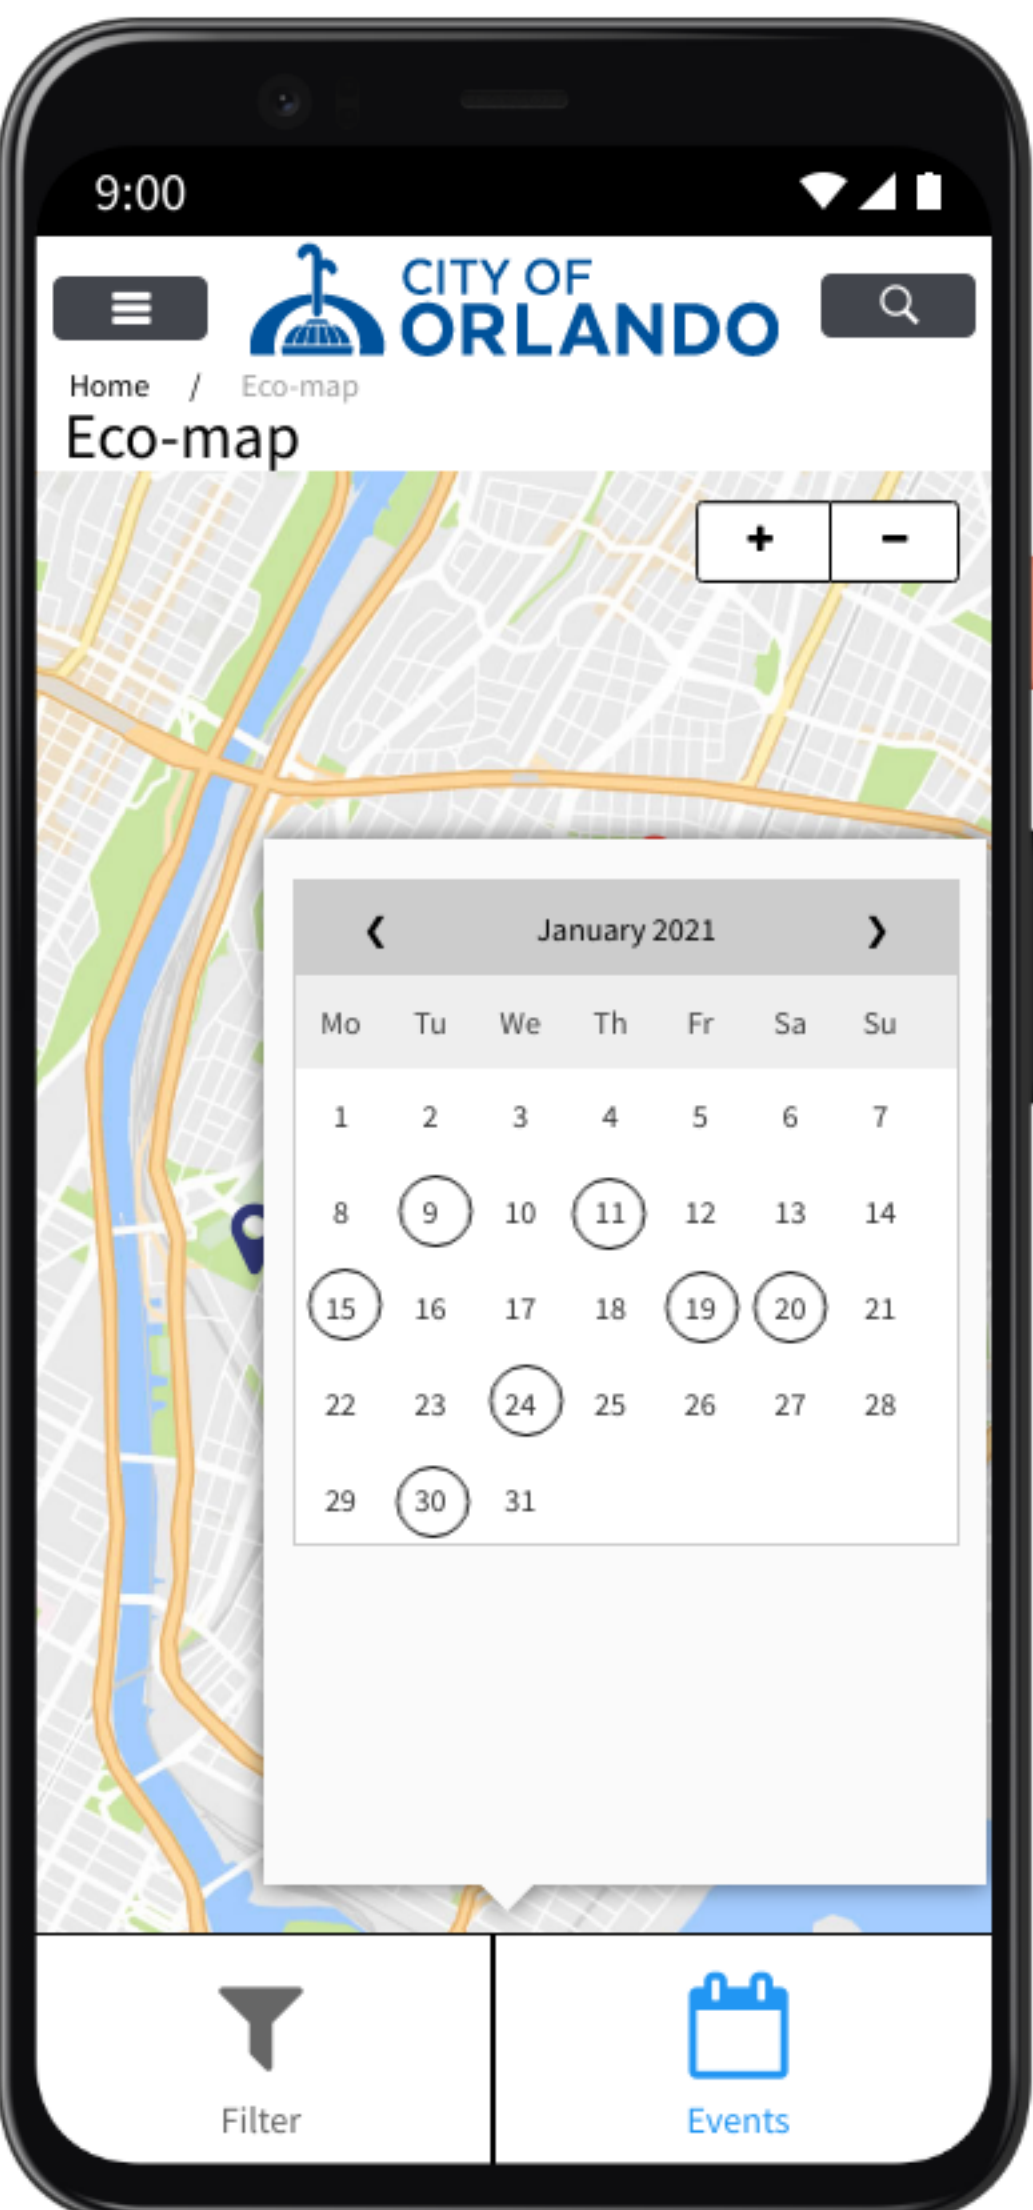

The user selects the icons to filter those options out of the map

4

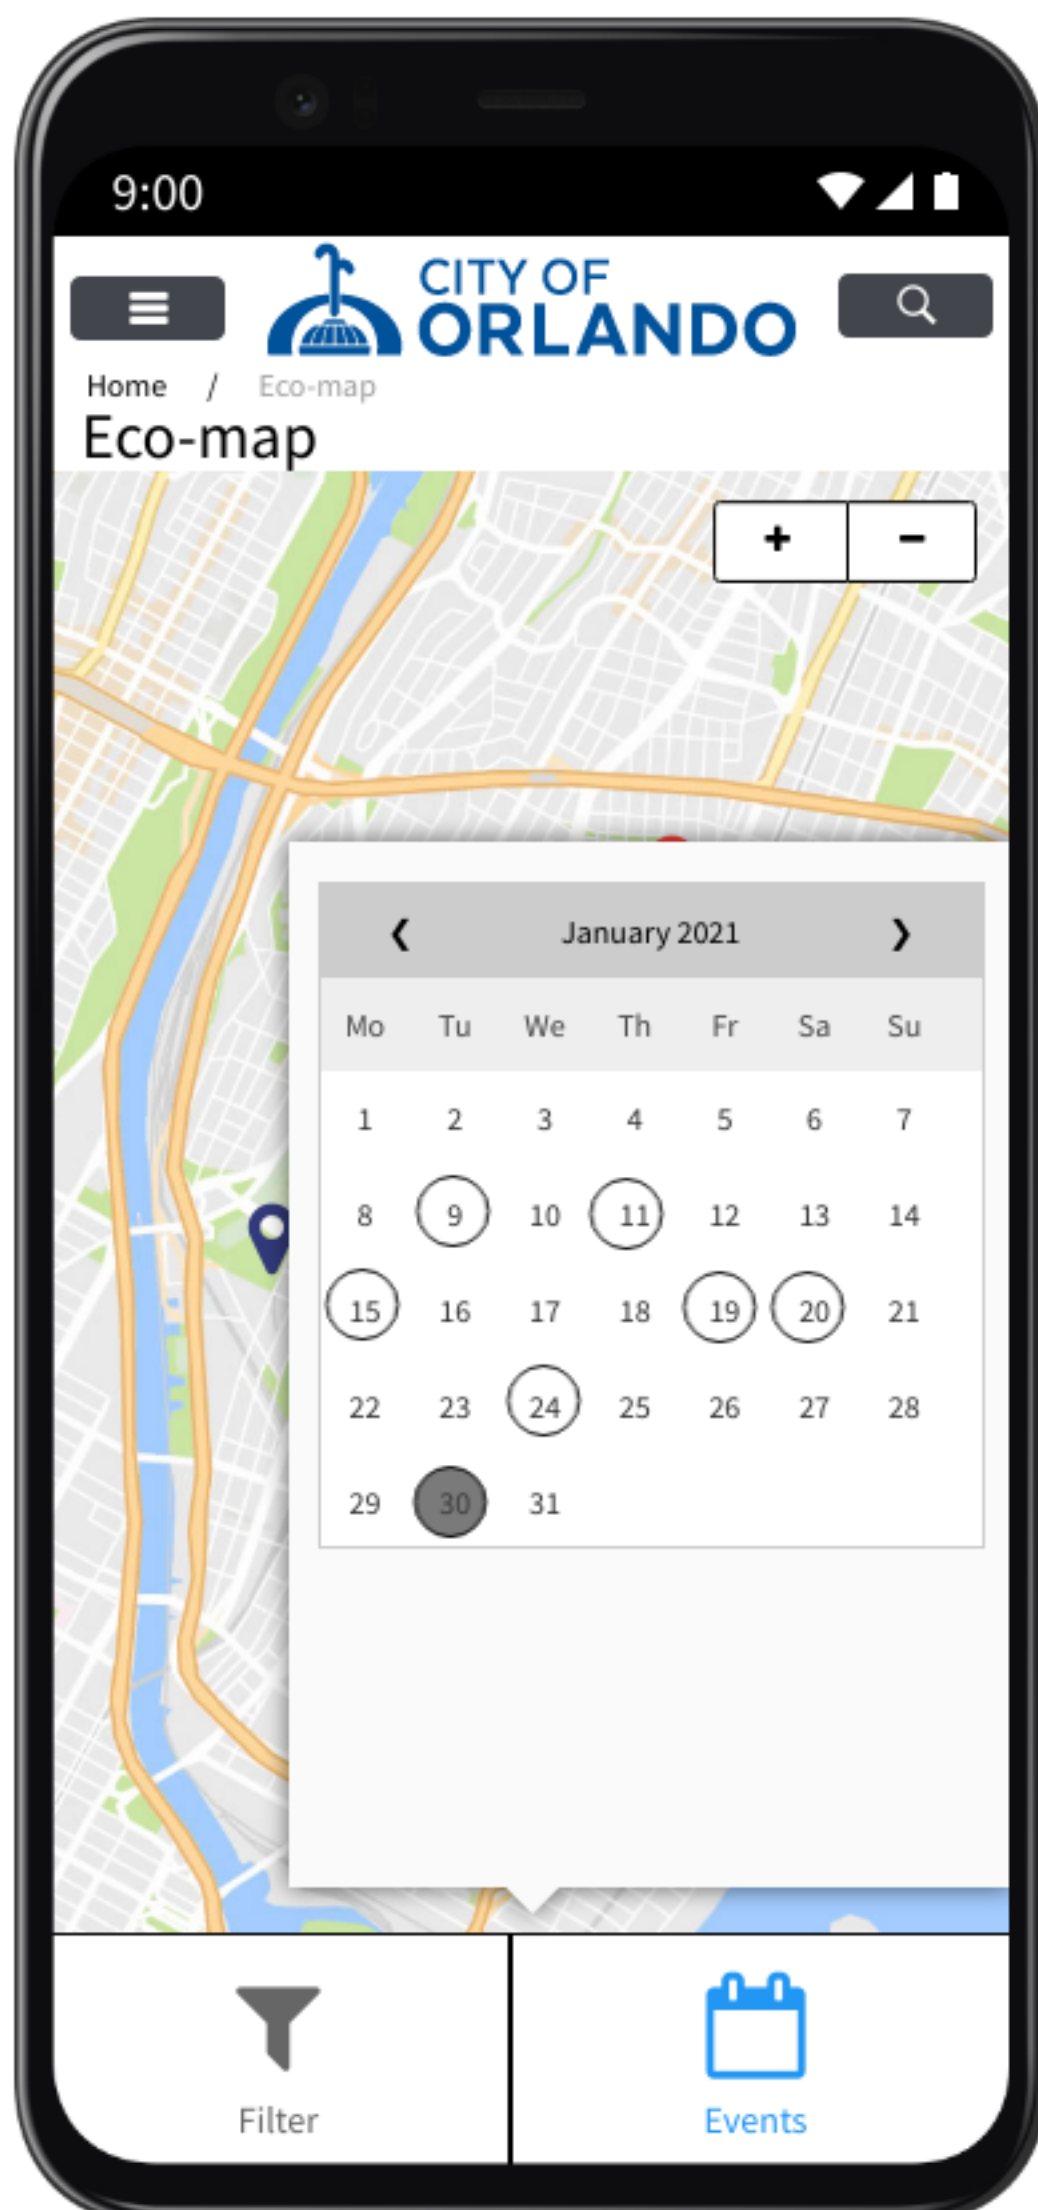

The user selects Filter again to close the menu, saving the changes and updating the map

5

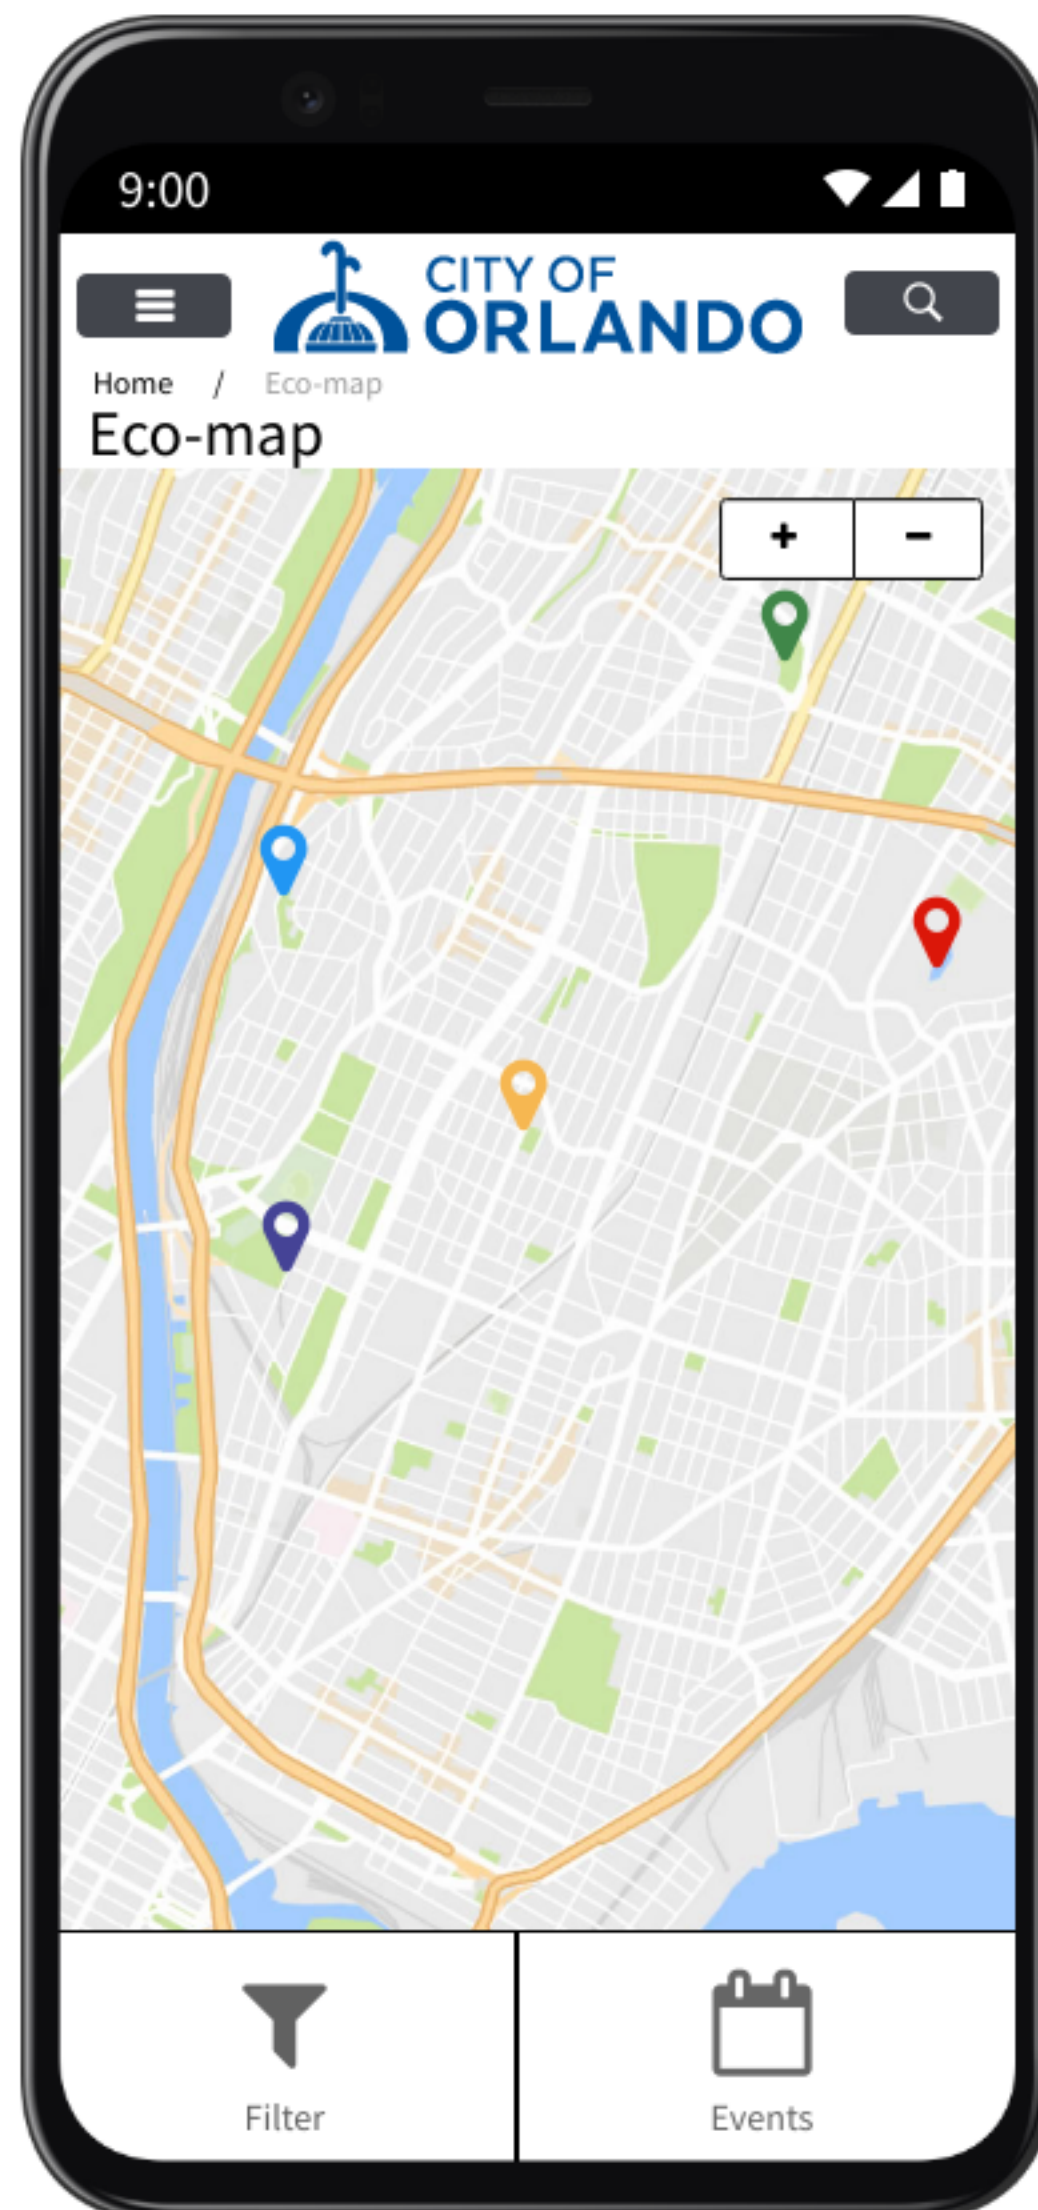

The user selects the Events icon to open the events calendar

6

The user selects a date with an event

7

The map is now shown with the items from the date the user chose
